Currency Technology

# BPS<sup>®</sup> C2

Outstanding performance  
meets compact size

Outstanding performance with compact dimensions: the latest generation of tabletop systems from G+D enables banknotes to be processed even more efficiently and cost-effectively. A throughput rate of 1,050 banknotes per minute ensures outstanding productivity – even when reading serial numbers. Two output compartments offer an array of options for sorting, such as by denomination, orientation, or fitness. What's more, the best sensors in their class guarantee maximum reliability for authentication and fitness detection. This makes BPS C2 the go-to choice for top performance and a high degree of variability for commercial banks, retailers, cash-in-transit companies and casinos.

# Extraordinary efficiency for future-proof operations

## GREATER PRODUCTIVITY

The high throughput of BPS C2 considerably increases productivity. With no loss of speed, banknotes are counted, checked for authenticity, and sorted by denomination, orientation, and quality. User-oriented and optimized operator guidance keep the number of work steps required to a minimum.

## GREATER SECURITY

BPS C2 boasts the ultimate top-class sensor – fast, reliable, precise. The system's remarkable capability to detect counterfeits and sort for fitness reliably and consistently throughout the service life of the system is setting new standards.

## GREATER EASE OF USE

Intelligent software architecture ensures a simple and intuitive operation and also enables the user to make precise alterations to suit specific customer requirements, so offering maximum flexibility. Intuitive operation has been redefined – streamlined, unique, and scaled down to what's important.

## GREATER FUTURE VIABILITY

Numerous interfaces make it easy to integrate BPS C2 into your processing environment and to fully leverage the versatile nature of networked industry. Modern tools, apps, and web services can be seamlessly included for customer processes that are efficient and cost-saving.

# 1,050

## BANKNOTES PER MINUTE

BPS C2 combines speed with precision. It always achieves a consistent speed, during counting, sorting, authentication and even when reading serial numbers.

## Our experts will help tailor-make the perfect solution for you

G+D experts use their expertise and experience to help you to find precisely the right solution for your individual requirements – and to seamlessly integrate them into your system landscape.

Let's talk!

## TECH FACTS

<b>Speed</b> 1,050 BN/min	<b>Output compartment capacity</b> (depending on BN quality) up to 250 BN	<b>Dimensions (H x W x D)</b> 51 x 33 x 39 cm	<b>External connections</b> 1 x LAN, 4 x USB host, 1 x USB device
<b>BN formats (Length x Width)</b> 100 – 181 x 60 – 95 mm	<b>Reject compartment capacity</b> (depending on BN quality) up to 100 BN	<b>Weight</b> ~ 26 kg	<b>Certificates</b> CE, GS, CB
<b>Currencies</b> up to 10 currencies		<b>Temperature range</b> 15 – 35° C	
<b>Singler capacity</b> (depending on BN quality) up to 900 BN		<b>Electrical specifications</b> 100 – 240 VA, 50/60 Hz
